The allies already hold the ground dominating Lens and a terrific battle is raging there today.

Shifting of German forces from the East to the West continues, but reliable information is lacking.

Greece Getting Ready.

(By Associated Press.)

Athens, Sept. 30.—The Greek Chamber in special session yesterday ratified the action of the government in prescribing a general mobilization of the army, and authorized a loan of \$30,000,000.

Premier Venizelos told the Chamber that Greek mobilization was indispensable on account of Bulgaria's mobilization, notwithstanding Bulgaria's explanation that she would maintain armed neutrality. The Premier says the situation is grave and the state of affairs following Bulgaria's mobilization could not be prolonged indefinitely. He said Greece was ready to oppose any Nation from attempting to gain a predominating position in the Balkans.

WIRELESS TELEPHONE A SUCCESS

Human Voice Transmitted for First Time 2,500 Miles Without Wires.

(By Associated Press.)

Washington, Sept. 30.—Wireless telephone communication across the continent was accomplished for the first time Wednesday when experiments extending over several months culminated in successful transmission of the human voice by radio from the great naval plant at Arlington, Va., across the continent to the station at Mare Island, Cal., 2,500 miles away.

The experiments were conducted under direction of Captain Ballard, chief of the navy's radio service, in co-operation with the American Telephone and Telegraph Company and the Western Electric Company. Secretary Daniels, announcing the results last night, predicted that further development of wireless telephony would make great changes in long distance communication both for military and naval service in commercial usage. Successful operation of a device for automatically transferring the radio telephone conversations originating on metallic circuits also was accomplished in Wednesday's tests. President Theodore N. Vail and other officials of the American Telephone and Telegraph Company at New York talked easily with the Mare Island station, the conversations traveling over an ordinary metallic line from New York to Arlington and thence by radio across the continent.

"The fact that the voices can be started on a land wire and automatically transmitted to a voice radio transmitter," said Secretary Daniels, "holds out hope that persons inland should readily be put in touch by telephone with others at sea through some central transmitting station."
